

BATTERY BACK-UP SMPS

KRP-BB-100-XX

The KRP-BB-100 series is one of KRITSNAM's enclosed Battery Back-up power supplies. It functions from a wide AC input range and at the same time accepts Battery input dc voltage. When ON mains, it delivers around 80 Watts of power to the load, and also keeps the battery in fully charged conditions using constant current charging of **1.5 Amps**. Upon failure of mains the battery is automatically connected to the load in Zero transfer time. The unit prevents the battery from deep discharge by automatically disconnecting the battery from load if the battery voltage falls below the deep discharge level. The unit comes with a host of protection features like overload, short circuit, input under voltage, Battery reverse polarity, etc. making it a totally full proof system.

Salient Features:

- Input 180 to 280V AC operating range
- Can provide continuous Power of 100Watts at +60° C ambient.
- Low Standby Power Consumption and High Efficiency
- Input under voltage protections (141VAC)
- Output short circuit, over-load, over-voltage protection
- Can be mounted both Vertically and Horizontally with Panel Mount.
- Leading supplier for major OE manufactures.
- All our products come with a 1-year warranty against all manufacturing defects
